PROFESSIONAL EXPERIENCE

Independent Security Researcher Jan 2022 – Present
HackerOne, Remote
Acknowledged and paid by over 30 organizations in different industries including Sony, Spotify, Sephora, Dice.fm, Hugging Face, Cameo for reporting security vulnerabilities to security programs.
Found IDOR, XSS, business logic, and race condition vulnerabilities.
Compiled detailed reports on findings and submitted to the security team.
Communicated with the security team to address and resolve reported vulnerabilities.
Collaborated with other security researchers in multiple reports.

PUBLICATIONS

Accepted as a writer for InfoSec Write-ups and published write-ups, sharing resolved findings to educate others all while in high school.

PROJECTS

Lo-fi ATC Japan(lofiact.firat.run): A fun project where you can listen to some lo-fi music while hearing the ATC of Tokyo International Airport. Next.js / Tailwind
Localized the steam page of the game "BZZZT" into Turkish while in high school.
